From: **Dr. Mike O'Leary**
Head GASSER, OHPguitar.com

Listen carefully -- if you've *ever* lusted for the ability to pick up *any* guitar, in *any* situation (even under blazing stage lights, backed by skeptical and unfamiliar musicians)... **and instantly blow the room away** with a killer, sizzling solo that makes other guitarists despair and every girl in the crowd suddenly attentive... then this short letter is going to *rock your world*.

Most guitarists -- even many professionals who tour regularly or back up famous artists -- only master a relatively small "bag of tricks" when it comes to soloing.

But the *greats*... notorious axe-slingers like **Stevie Ray Vaughn, Eric Clapton, Coco Montoya, Tony Iommi, Slash, Jimmy Page** and every other rock-god who ever hit the big-time... **have always relied on a DEEP "bag of tricks" that guarantees their solos stand out.** They NEVER hit a boring note, and audiences shut up when it's time for another solo.

You know it when you hear it. A true guitar hero knows how to **get inside your head** with melody, **inside your heart** with feeling... and **inside your soul** with sexy, world-class musical mojo that satisfies. **And gets the ladies wanting to boogie.**

And you know what? This is the BEST time in history to be a guitarist.

Why? Because, for the first time EVER... **YOU can now finally learn ALL the secrets of killer soloing... fast.** Overnight, if you're ready.

Even better... you can "test drive" every single one of these insider secrets...

**For Free,
If You Choose!**

Doesn't matter how long you've been playing, either. The entire musical landscape is changing, at lightning speed -- and even raw rookies now have the opportunity to ROCKET to the top of the pack... with the tricks, skills and laughing confidence of the **best guitarists who've ever laid hands on a fretboard.**

You're gonna remember this day for the rest of your life. Because from now on, whenever you pick up an axe and launch into a solo, every note you play is gonna scream...

Dues Already Paid!

Are you ready? Ready for **instant respect**... ready for the smug inner knowledge that will allow you to step onto any stage, with any other artist, **confident you can earn your spot there**, no matter what kind of music is being played... and ready for all the *glory and success* that gets showered on a hot guitarist?

Then here's a story you're gonna love: You may not have heard of Rudy Parris (yet)... but notorious guitar slingers worldwide *go out of their way* to hear him play. (**Billy Gibson** of ZZ Top *hugged* Rudy after watching him tear up the room during one of Rudy's many tours with notorious punk-a-billy Hank Williams III -- **that's HIGH praise.**)

Not one... but **TWO special-issue "StoneTone" guitars** (designed and built in the USA by famous moonlighting craftsmen) with Rudy's signature are being unveiled at the next **NAMM** show in Las Vegas. (Blues legend **Tommy Castro** snagged one of the first of these beauties out of the shop.)

How does a mostly unknown guitarist rate a glorious debut of signature axes at the world-famous NAMM show?

Simple: **By having the DEEPEST "bag of tricks" in modern rock.**

And Rudy filled his bag by figuring out something **very few guitarists ever realize:** The "magic" behind the *best solos in the universe* are all rooted in the **blues**. Not the scratchy crap you hear bad guitarists grind out. No -- the deep, soul-satisfying *funky* voodoo that comes straight from the Delta.

Rock, country, speed-metal, thrash, even new wave and jazz... **the JUICE of all head-turning solos starts with the wizardry of BB King, T-Bone Walker and John Lee Hooker.** (The **White Stripes**, **Kid Rock**, even the **Red Hot Chili Peppers** and **Joe Satriani** *rely* on this "blues juice" as the *fundamental* appeal for their music.)

But it's NOT just a matter of *copying* those blues greats. No way.

What Rudy learned to do...after years of struggle and experimentation... is to **BLEND those roots with everything else** modern guitarists have at their fingertips.

The result: Fresh, heart-stopping solos that will drop punks, rockers, head-bangers and even blues fools right to their *knees*.

And guess what? You do NOT have to struggle for years to get hip anymore.

Nope. Rudy did the struggle part *for* you. And he figured out the jaw-dropping **SHORTCUTS** that even clueless rookies can use to go from fumbler to cocky soloist in record time.

How good do you wana get? Rudy has opened for **BB King** and **Bo Diddly**, toured with **Merle Haggard**, and taught his secrets to some of the now-gnarliest guitarists on the circuit. (Rudy doesn't share his lessons with just anybody -- he doesn't even take on private students, because he knows he only needs a couple of sessions to "install" everything you need to know.)

And he is one tough guy to nail down for lessons. He's a working guitarist, touring and backing up major artists. **No time for personal lessons.**

Still... because so MANY guitarists stalk him -- just to pick up a *hint* of what he's doing to get such amazing tone and boogie -- he has developed a unique "**Quick Learn**" teaching style.

That's rare -- to find a hot musician who *also* understands how to teach someone else what to do. Great playing isn't a mystery to Rudy... **and he knows exactly how to reveal ALL those killer secrets to you, too.** In record time.

Here's just a taste of what he shows the lucky guys who become his students:

- ✓ **The secret ear-bending strategy behind "pro level" blues scales that work like magic** to turn even short solos in alt, punk or country styles into *masterpieces*. (Other musicians won't stop talking about you... and even hot, arrogant rhythm sections will be instant fans.)
- ✓ **Insider tone and equipment tips that shortcut the hardest part of getting started** -- for *very* little money, you can outfit yourself with the finest soloing rig available. (And skip all the frustration most guitarists go through of experimentation and wasting time and cash with equipment that you can't get good tone from.)
- ✓ **How to comp greasy, super-funky organ riffs** from greats like **Jimmy Smith** -- a voodoo secret that greats like **Wes Montgomery** and **George Benson** have used to define their slinky styles.
- ✓ **An entire menu of fresh, new, specific licks** you can throw into ANY solo that will turn heads and make other musicians swoop with melodic ecstasy. (NOT

your same-old, tired cliché licks, either -- this stuff is brilliant and HOT... and, once you learn them, can be mixed and matched so they always sound clever and new.)

- ✓ **The secret voodoo "turn arounds" that make your solos fluid and sexy** and definitely the work of a *savvy* musician (no matter how long you've been playing).
- ✓ **The little-known "magic" chords that DEFINE expert guitar playing** -- finally broken down for you in *simple, easy-to-master detail*. Learn just a *handful* of these little monsters, and you will NEVER be mistaken for an "average" guitarist again!
- ✓ **Rudy's special secrets for hand positions that guarantee easy access to every note, every wicked-ass bend, and every scorching arpeggio you care to play.** (Just *looking* at your hands will convince other in-the-know guitarists that you've got your act down cold.)

And much more. **How to tune "to the group"**, which earns instant pro-level respect in the rhythm section and guarantees you'll sound great... how to get off the wah-wah "merri-go-round" and **start ripping on that pedal the way Hendrix worked it...** how to comp behind any singer to make them sound better than ever (*fastest way to get asked to play again with any band*)... **how to bend notes like Albert King** (most rookies flub this and RUIN solos) -- the *main secret* behind **Eric Clapton's** genius soloing... double-stop endings that scream "pure class" and *punctuate your solos so they become memorable* (they'll be talking you long after you've left the building)... touring pro hand warm-up secrets... and so much more it would take me three pages just to outline it all.

The bottom line: Rudy has "broken the code" on instantly crafting killer solos -- in *any* style, playing with *any* group, under *any* conditions -- that ooze sexy confidence and generate excitement even among jaded pros who've "heard it all". (Leave your "rookie" status behind forever, starting right now.)

Whether you want to front a band... sit in with hot groups (and get ASKED to sit in) whenever you hit clubs... get a job with an existing group... or just be the best damned guitarist in town... **this is ALL you need.**

Go from rookie (or "stuck" journeyman player) to the hot new kid on the block literally *overnight*.

That's how powerful these secrets are.
